

Property Name Florence & Cripple Creek Railroad Combination Car No. 60

BOUNDARY CHANGE - RELOCATION

Florence & Cripple Creek Railroad Combination Car No. 60
The Cumbres & Toltec Scenic Railroad
Antonito, Colorado

Combination Car No. 60 was listed in the Colorado State Register in June 1999 under criteria C for engineering significance and A for historical significance in the area of transportation. The car was built in 1897 for the Florence & Cripple Creek Railroad (F&CC), the first railroad to reach the gold mines of the Victor and Cripple Creek mining districts. The car operated as a suburban coach until about 1909 when it was converted to a combination baggage and passenger car. One of only two surviving F&CC passenger coaches in the United States, it is the only surviving example of a combination passenger-baggage car from the railroad.

The nomination indicated that the car rested on the grounds of the Western Museum of Mining and Industry, north of Colorado Springs. Due to a change in mission objectives for the Western Museum of Mining and Industry, it was necessary to relocate the car. In August 2001, the car was moved to the Cumbres & Toltec Scenic Railroad in Antonito. Permanently relocated in Antonito, it awaits the facilities and time to undergo restoration.

Verbal Boundary Description

The car is located within the boundaries of the Cumbres & Toltec Scenic Railroad Colorado State Register District.
